

HAVE NOT BIG FEET

Chicago Girls Are Just Too Sweet
for Anything.

THEY ARE ALSO STYLISH

When an Envied Philadelphia Girl
Speaks Well of How She Must
Be All Right.

Though the exposition may be the main object of your trip to the west, you cannot, particularly if you are a woman, help observing the girls of the Windy city, for they have been so frequently written up as having huge pedal extremities that curiosity gets the better of you and you are rude enough to stare at everyone you meet, expecting to see each individual heel wearing at least number sixes.

Having an opportunity to meet many of them socially, a great shock awaited the writer, as she found that instead of having over-large feet, they were, one and all, blessed with well shaped, daintily bootied ones, and in many cases veritable Cinderellas were discovered who had lived all their lives in the

white silk. The robe of robes, for there are several of them, was described as a diaphanous mass, crumpling at the edges with desire. The material is a crepe or some thin stuff, and the effect would be like that worn by Louis XIV. It is made with a long collar, ruffles down the back and a high collar like a Mediceo dress. The upper layer was once white, and is now the color of ivory, embroidered with flying birds the size of crows, with diamonds, gold, green, blue and violet. Then comes several layers of the silk waist, yellow, blue, violet, old gold and green, on which were scattered strange animals, all in flight. The seventh, which encircles the body of the long-drawn corset, is violet embroidered with figures like phantoms. It is embroidery on this wonderful robe is said to be as transparent as the gauze. The effect of the whole is smoke-colored.

Nurses Above Women.

In noting the momentum of the woman movement the fact may be overlooked that women was recognized intellectually in some universities centuries ago. In the University of Salamanca she had a place, and when Isabella of Spain desired to acquire the Latin tongue it was to a woman that she turned for a tutor. In Italy, even in the thirteenth century, a noble Florentine lady won the palm of oratory in a public contest in Florence with learned doctors from all over the world.

The first order which the dressmaking of the Professional Woman's league received came from its president, Mrs. A. M. Palmer. The gown is of black brocaded satin combined with

Small
